

Welcome Linux 2022

www.adafrolabs.com

Playing “Bandit”

1. Go to <https://overthewire.org/wargames/bandit/>
2. Read the opening documentation.
3. On the left hand side, click "Level 0".
4. You can "level up" by solving each puzzle and that allows you to keep moving forward incrementally in the testing of your linux knowledge.
5. Hint* - Each level starts with connecting to a different ssh address.

Let's get started

The solution to completing Level 0:

- a) Open a Terminal Window and type in: **ssh bandit0@bandit.labs.overthewire.org**
 - b) Password is bandit0
 - c) Once you type those in, you will be in the game.
 - d) Go back to the bandit website and click on the Level 0 — Level 1 on the left hand bar
 - e) It will tell you where the password is located. In the terminal window, use the commands you have learned in order to find the password.
 - f) When you solve that puzzle, you copy the password for level 1 (select it with your cursor, right click and say "copy").
 - g) Then log out of the SSH window by typing "exit"
-

h) To get to level 1, type `ssh bandit1@bandit.labs.overthewire.org` and the password you discovered.

i) For each Level, write down the command line steps you took to solve the puzzle. We will be asking you why, so please do not copy from others!

i) You only need to complete 10 levels and will get bonus points and a cash prize for completing additional levels!

Level Number	Solution	Points
1		0.5
2		0.5
3		0.5
4		0.5
5		0.5
6		0.5
7		0.5
8		0.5
9		0.5
10		0.5
11		0.5
12		0.5
13		0.5
14		0.5
15		0.5
16		0.5
17		0.5

18		0.5
19		0.5
