# Welcome
Linux 2022

www.adafrolabs.com

If necessary, recreate your lab2 directory structure from the last lab. With help from a classmate, perform the following operations using lab2 directory contents, using shortest path names possible and one command for each task. Keep notes in the space provided.

- While in lab2, rename file a.txt to al .txt

  Command: _____

- While in lab2, delete the directory three

  Command: _____

- White in directory four, copy c.odt and x.mp3 into your present working directory (.)

  Command: _____

- Hide al .txt. You do not know your PWD (Hint: use relative-to-home path name)

  Command: ~/lab2/.a1.txt

- Copy directory five into your home directory. (HINT: use - to represent your home dir) Your PWD is lab2.

  Command: _____

- While in directory one, duplicate b.dat into lab2

  Command: _____

- Relocate directory one into /tmp. Your pwd is lab2.

  Command: _____

- Remove file d.html. Your PWD is four.

  Command: _____
